## SUMMARY

Full stack developer and project lead with 3+ years of building web apps in React, Next.js, Node.js, TypeScript and PostgreSQL, mostly ERP, BI and e-commerce. At Sarvadhi I led two ERP projects: I planned modules with the PM, split the work across developers, reviewed code and ran the releases. I use Claude Code every day and write the rule files that keep its output in line with our code, and I'm now moving into agentic AI work.
